

Job Posting

Location: Kirkland, WA

Job title: IT Network Security Engineer

Reports To: Director, IT Service Delivery

Type of Position:

Full – time, Non-Exempt

Salary:

DOE

Posting Period:

Purpose of Position: Wave is currently looking for an experienced Network Security Engineer with a passion for solving complex technical hurdles and an excellent background in network design and security. The ideal candidate possesses a blend of tactical hands-on capability, strategic planning and design abilities, a friendly customer attitude, and exceptional multi-tasking capabilities

Responsibilities:

- The ideal candidate will exhibit strong leadership skills, will be self-motivated, and will be able to work effectively in a diverse, talented team, continuously striving for excellence
- Develop and implement strategies for securing assets, customer services delivery, and regulatory/audit compliance.
- Perform security engineering tasks such as implementing firewall changes, establishing VPNs with partner companies
- Deliver infrastructure solutions that are technically sound, resilient, operationally supportable, well documented and meet the requirements of the business and industry best practices
- Participates in, leads and guides others to translate business requirements into technical designs. Ensures compliance with standards for designing and deploying technical solutions.
- Initiates process improvements for new and existing infrastructure. Participates in developing and maintaining enterprise systems architectural strategies that support the business.
- Stays current with technology trends and shares that knowledge with management, peers and customers.
- Designs, develops, implements, and documents moderate to complex technical solutions and ensures deliverables are high quality and meet business expectations. Oversees and contributes to the documentation of production support processes. Anticipates long term support issues and plans for corrective actions.
- Participate in on call rotation that might involve weekend or night coverage as assigned

Qualifications:

- Proven work experience as a system security engineer or information security engineer
- Thorough understanding of the latest security principles, techniques, and protocols

- Experience with network security and networking technologies and with system, security, and network monitoring tools. Cisco, Juniper, Palo Alto, and Netscaler.
- Hands on experience in security systems, including firewalls, intrusion detection systems, anti-virus software, authentication systems, log management, content filtering, etc.
- Experience with Windows security features, Active Directory, and Group Policy
- Experience leading and mentoring others as a senior technical member of the team
- Experience using diagnostic, monitoring, problem and change management tools
- Strong sense of ownership and accountability.
- Understanding of ITIL methodologies with experience in incident, problem, and change management.
- Ability to effectively communicate both written and verbally.
- Ability to work independently and problem solve with little or no supervision.

Diverse Workforce / EEO:

Wave Division Holdings (WDH) recognizes and strongly supports the benefits of a diverse workforce, and strives to provide a culture that recognizes the unique contributions of each of our employees. WDH requires a drug test, background check, employment and education verification as conditions of employment. WDH is an equal opportunity employer and will consider all qualified candidates regardless of race, color, religion, national origin, gender, age, marital status, veteran status, and the presence of a non-job related handicap or disability, or any other legally protected status.
