Operating Instructions For

CABLE Remote Control

UR5L-8700L & UR5L-8720L

Universal Remote Control, Inc.

OCE-0060F  REV 01 (02/01/08)

Introduction

The CLIKR™-5 Universal Remote Control allows you to operate your cable TV receiver, VCR, DVD, and other audio-visual equipment. The CLIKR™-5 is compatible with almost all brands of cable TV equipment. Instructions for operating TV, VCR, DVD, and Audio equipment are included in this manual.

Replacing Batteries

Before using your remote control, make sure you have installed the batteries. The batteries power the remote control, allowing you to operate your equipment from a distance. For best performance, use two AA alkaline batteries. The batteries should be installed with the correct polarities; the positive and negative terminals should be aligned as indicated in the battery compartment.

Volume and Mute through the TV, VCR or AUX.

Before you program or operate the remote control, you must install two new AA alkaline batteries. Before you program or operate the remote control, you must install two new AA alkaline batteries. Before you program or operate the remote control, you must install two new AA alkaline batteries.

Volume Default:

The default volume setting is the volume level that is stored in the remote control's memory. This level is set when the remote control is initially programmed for a specific component. You can change the volume default to suit your personal preferences. To change the volume default, follow the steps below:

1. Turn on the component you want to program (TV, VCR, or AUX).
2. Press the [COMPONENT] button labeled with the component you want to program (TV, VCR, or AUX).
3. Press and hold the [VOL+/-] button until the Component LED blinks twice. This indicates that the program is active.
4. Press the [VOL+/-] button again to change the volume level. Repeat this step until the desired volume level is reached.
5. Press the [COMPONENT] button to save the new volume level. The Component LED will blink twice to confirm the new volume level has been saved.

CABLE Set Top Box (STB)

To automatically transfer to the respective Component mode you select, as follows:

1. Programming Channel Control

Press the [TV] button. The Component LED will blink twice to confirm the programming.

2. G. AUX Function: Programming a 5th Component

You can take advantage of the AUX function to program a 5th Component such as a second TV, VCR, DVD, or other audio-visual equipment. Follow the steps below to program a 5th Component:

1. Turn on the Component you want to program (TV, VCR, or AUX).
2. Press the [COMPONENT] button labeled with the Component you want to program (TV, VCR, or AUX).
3. Press and hold the [VOL+/-] button until the Component LED blinks twice. This indicates that the program is active.
4. Press the [VOL+/-] button again to change the volume level. Repeat this step until the desired volume level is reached.
5. Press the [COMPONENT] button to save the new volume level. The Component LED will blink twice to confirm the new volume level has been saved.

3. F. Finding a Component Button’s DVD Set-up Code Number

You can use the “Finding a Component Button’s Code Number” function to find the set-up code number for a specific Component. To do this, follow the steps below:

1. Turn on the Component you want to program (TV, VCR, or AUX).
2. Press the [COMPONENT] button labeled with the Component you want to program (TV, VCR, or AUX).
3. Press and hold the [VOL+/-] button until the Component LED blinks twice. This indicates that the program is active.
4. Press the [VOL+/-] button again to change the volume level. Repeat this step until the desired volume level is reached.
5. Press the [COMPONENT] button to save the new volume level. The Component LED will blink twice to confirm the new volume level has been saved.

I. Programming Channel Control

Press the [TV] button. The Component LED will blink twice to confirm the programming.
