It's simple to program your remote to control your TV.

HD Set-Top Box Remote Control

USER’S GUIDE

Here’s what your remote can do.

Troubleshooting

GENERAL TROUBLESHOOTING
1. Why does the indicator LED flash red, but there is no response when I press a key?
   a. Make sure the remote is aimed at your TV and is not further than 15 feet away. Also, make sure your HD Set-Top Box is activated and in play mode.
   b. Why does the indicator LED turn red while I am programming my remote?
   c. You may have entered the wrong code. Check the codes and try programming again.

PAIRED REMOTE TROUBLESHOOTING
1. How can I find which HD Set-Top Box my remote control has been paired with?
   a. A code will pair a device, the remote will only work with that specific HD Set-Top Box.

FCC Warning

Note: This equipment has been tested and found to comply with the Class B limits for radio frequency emissions, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. There is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or experienced radio/TV technician for help.

Installing your HD Set-Top Box out of sight.

Your remote control can be paired directly with your HD Set-Top Box, allowing you to place the device out of sight for a greater entertainment center or behind your TV, for example.

Follow the steps to the right to pair your remote control to your HD Set-Top Box. If your remote control is paired to a specific HD Set-Top Box, it will not control any other HD Set-Top Box in your home.

Here’s how to do it:
1. Program your remote to control your TV as described in the “How to program your remote to control your TV” section. If you’ve already done this, proceed to Step 2.

Follow the HD Set-Top Box instructions to enter the remote pairing screen. Please ensure you have the HD Set-Top Box on or in the menu.

Press and hold the Setup button until the indicator LED changes from red to green.

Press and hold the Menu button on the remote control. Your TV will display an on-screen instruction. The on-screen instructions do not appear, you may need to press the Menu button again — up to two times.

Press and hold the on-screen instructions to enter the 3-digit code that appears.

Once this code is correctly entered, the remote will pair with the HD Set-Top Box on your TV.

FREQUENTLY ASKED QUESTION ABOUTPairing:

Why does the indicator LED flash green then red during pairing?

The remote control will be un-paired from that device and can be used for other HD Set-Top Boxes in your home.

Remember, when using your remote control with a new TV or HD Set-Top Box, you may need to program the remote control to work those devices.

Follow the steps included earlier in this guide to program or reprogram your remote.
